

Company Profile

INSPIRED BY
YOUR FLOW

„Vexve Armatury Group
aims to be the leading
provider of mission critical
valve solutions in the transition
to a low carbon future.“

ARMATURY Group a.s.

The company ARMATURY Group a.s. is a leading European manufacturer of industrial valves and distributor of pipings, technological units and accessories. The company started its operations on January 2000, however, the tradition of this dynamically developing company is closely related to the 50-year history of valve production in Moravia and Silesia.

Since 2019, ARMATURY Group has been part of the Vexve Armatury Group, which offers an extensive portfolio of valves for a wide range of industrial applications. ARMATURY Group specializes in tailor-made solutions for the gas, power and metallurgical sectors, Vexve supplies valves solutions for heating and cooling systems and ZMK Technologies is a globally leading designer and supplier of the most critical valves to the petrochemical industry.

All companies, ARMATURY Group, Vexve and ZMK Technologies are known for the superior quality of their products, fast delivery times combined with first-class customer service. The companies deliver their products to over 70 countries and employ around 800 people with factories in Czech Republic, Finland and Germany. The combined turnover of the Vexve Armatury Group is over €130m. The group is owned by DevCo Partners Oy, a long-term investor, which is dedicated to building world's leading companies in selected niche markets.

„We know
where we are
heading for...”

Vision, Mission & Values

Vision

“ARMATURY Group aims at becoming an internationally accepted manufacturer of industrial valves, discovering new opportunities incessantly, supplying to new markets, and establishing long-term relations with its business partners.”

Mission

“The mission of the company is to be a prospective and reliable partner in the fields of development, production, sales and servicing of industrial valves and supplies of piping and accessories both on the Czech market and abroad.”

Company Values

Dynamics

“ARMATURY Group is a dynamic company, reacting flexibly to the requirements and wishes of its customers to meet their individual needs and ensure their maximum satisfaction.”

Innovations

“The company supports in-house research and development, welcomes new challenges, and is involved in solution of even very complicated tasks. The company is doing its best to be one step ahead all the time.”

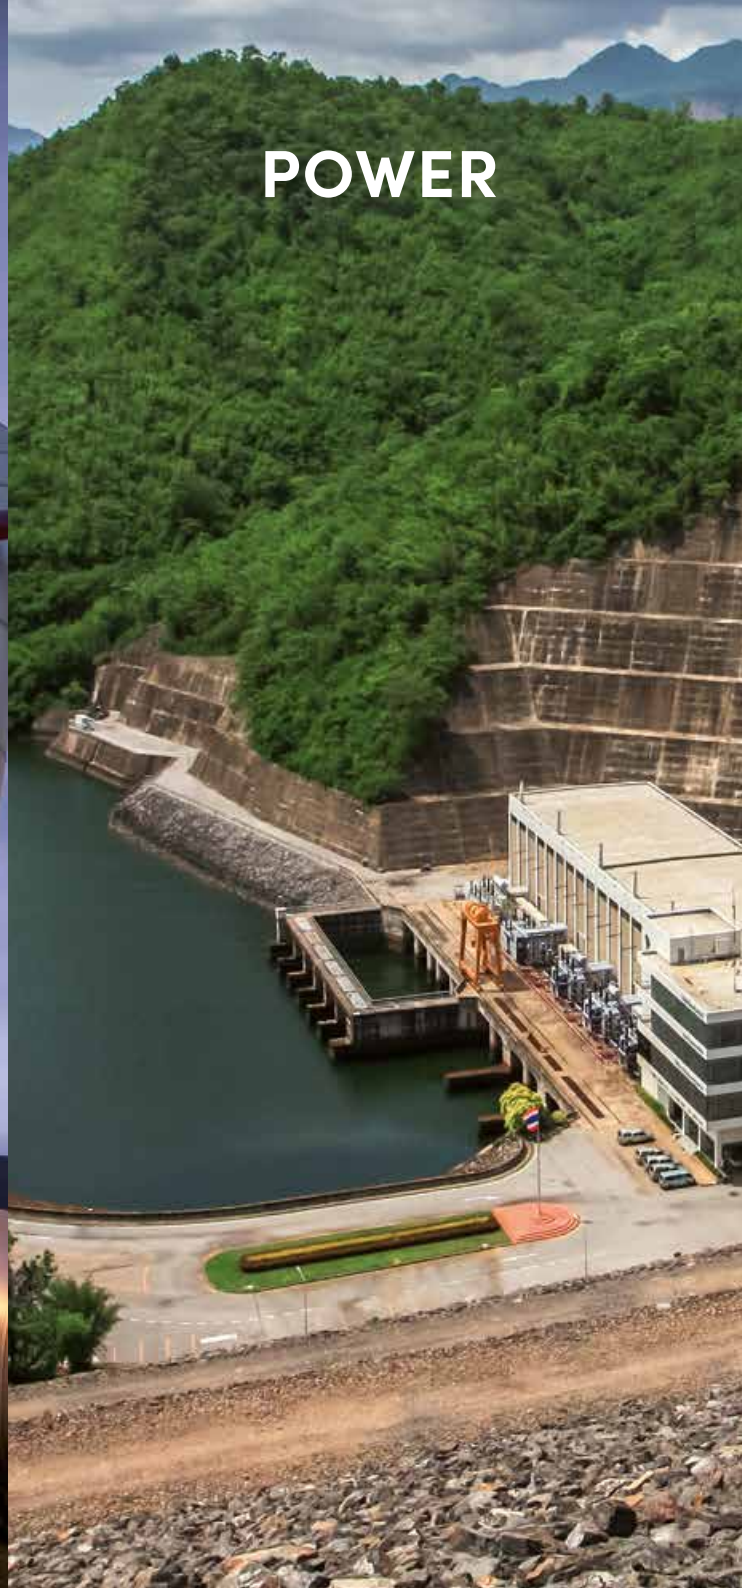

Social Responsibility

“ARMATURY Group behaves responsibly towards the society. The company supports development of its personnel, builds a positive atmosphere inside the company, tries to behave ecologically towards the environment and contributes to the development of the Hlučín Region.”

GAS

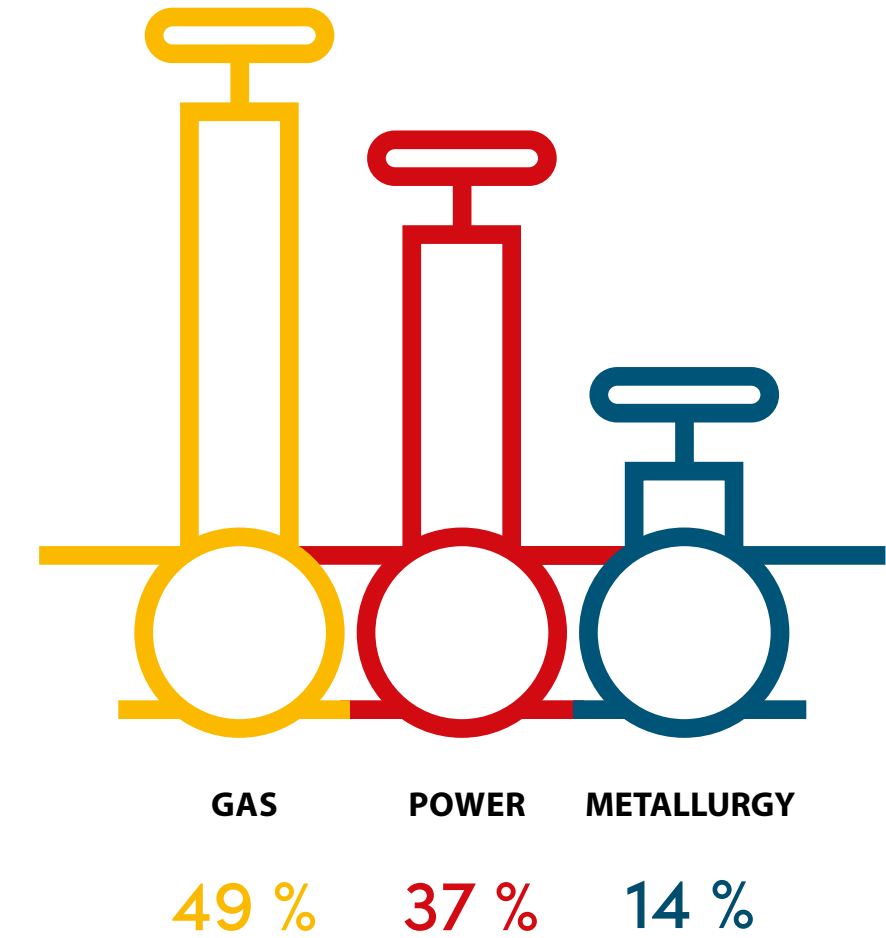

POWER

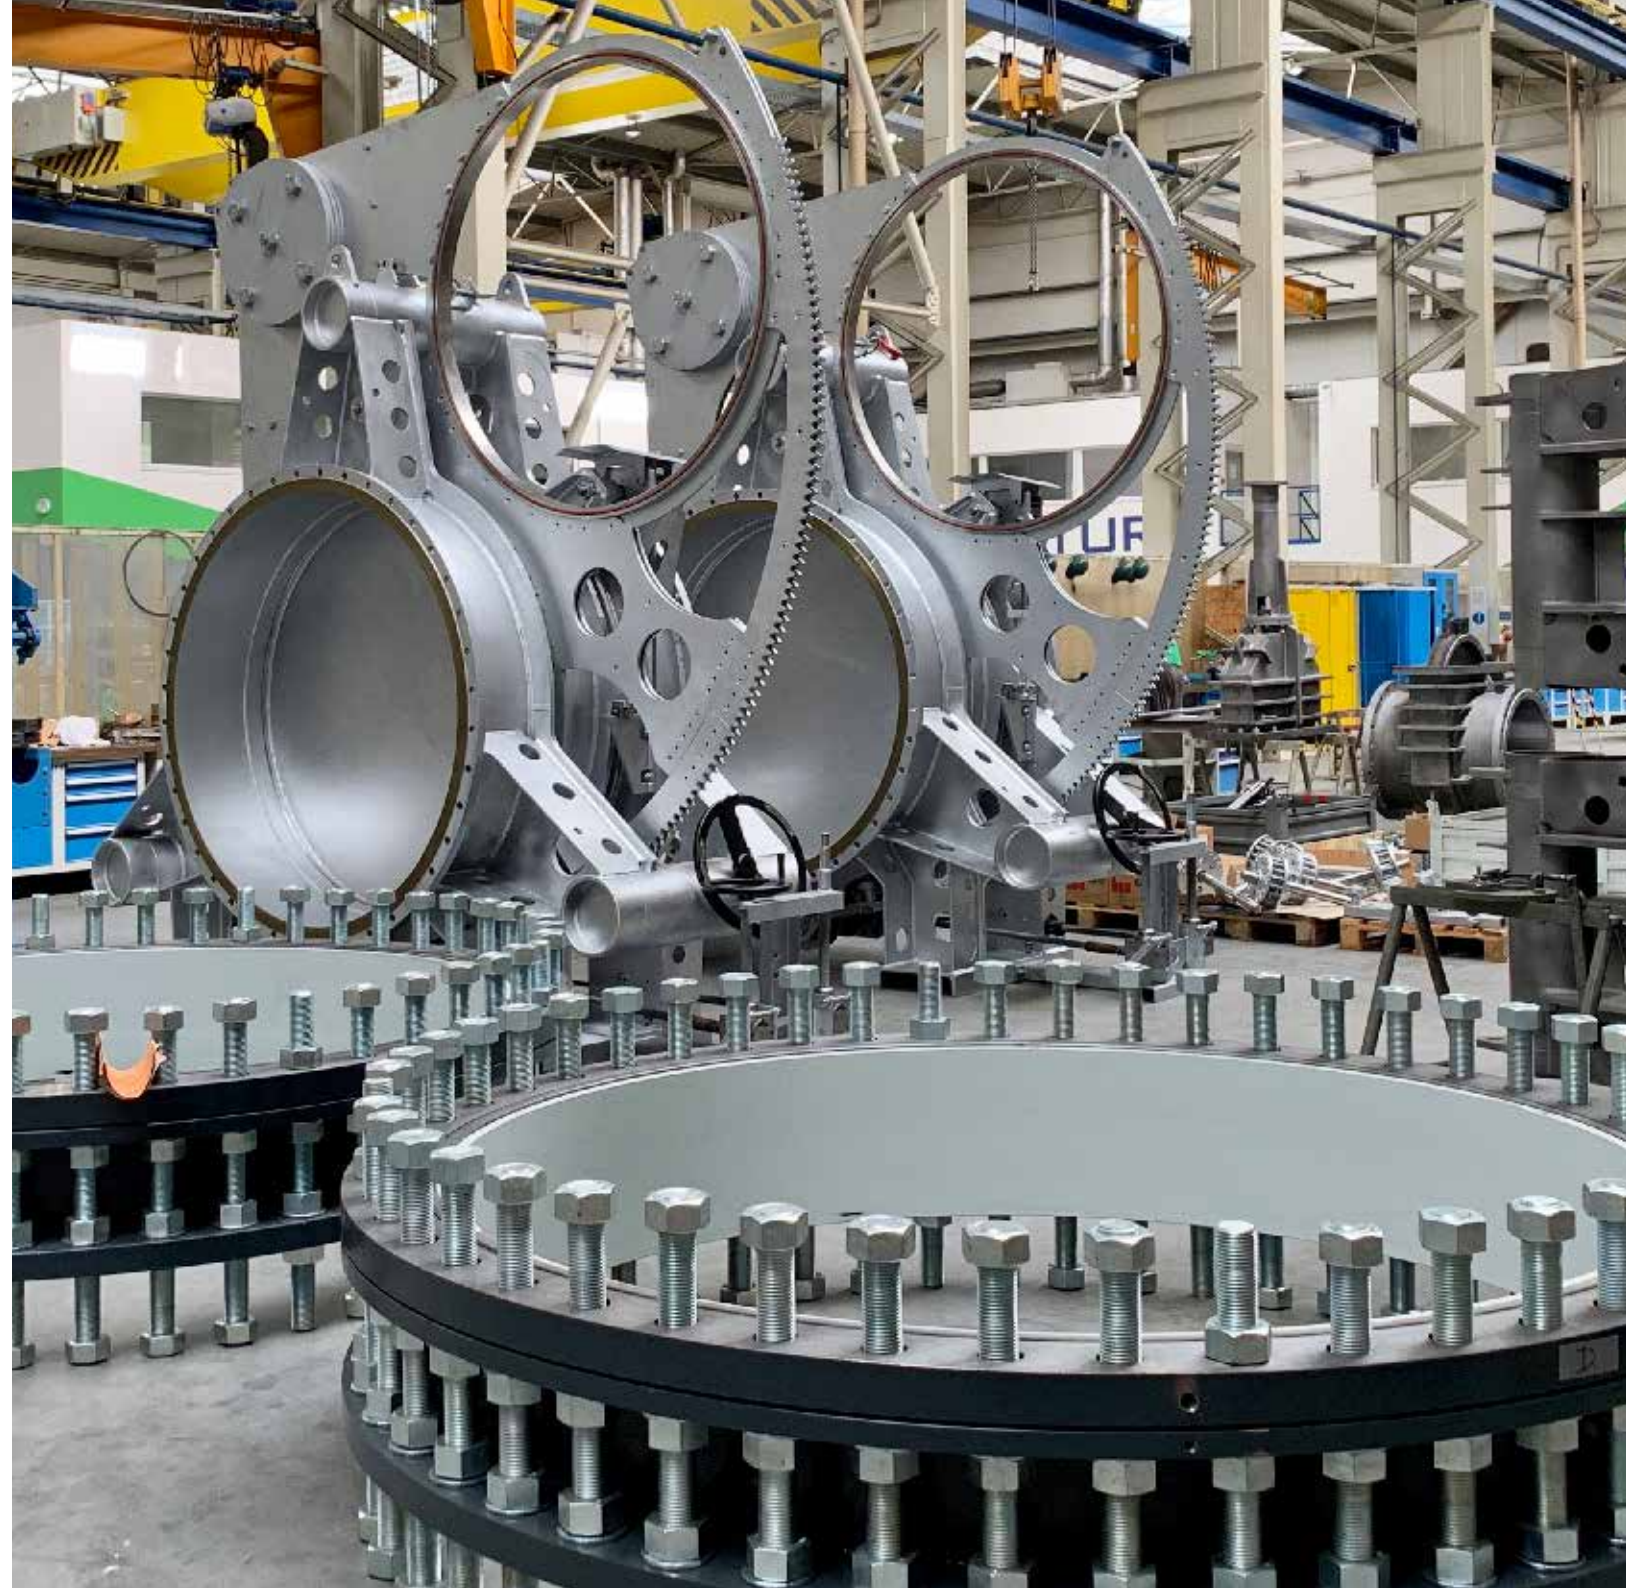

METALLURGY

Main Spheres of Business Activity

The major part of production and services is intended for gas sector, conventional and nuclear power engineering and metallurgy. However, the company has a broader orientation and operates also in other industries.

„We produce special valves for the severest conditions.“

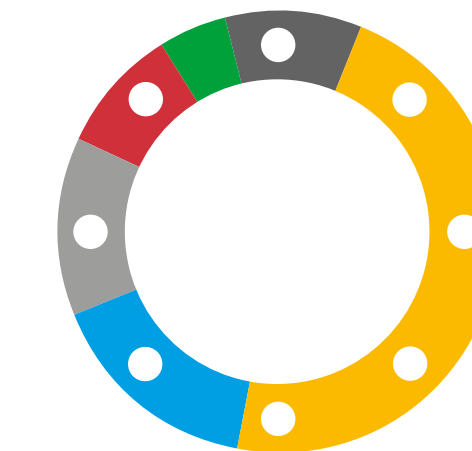

Industrial Valves

The great advantage of the company is the broad range of products in the group of industrial valves.

ARMATURY Group offers the possibility of comprehensive deliveries of technological units to its customers which incorporate deliveries of complete systems of various industrial valves and piping, including design documentation and advisory services from the project development stage.

The company is also involved in development and production of special valves that are being used under the severest service conditions.

47 %	Ball valves
16 %	Gate valves
13 %	Butterfly and check valves
9 %	Metallurgical valves
5 %	Globe valves
10 %	Other

„Cooperation
does not end
with the sale.”

Servicing and Repairs

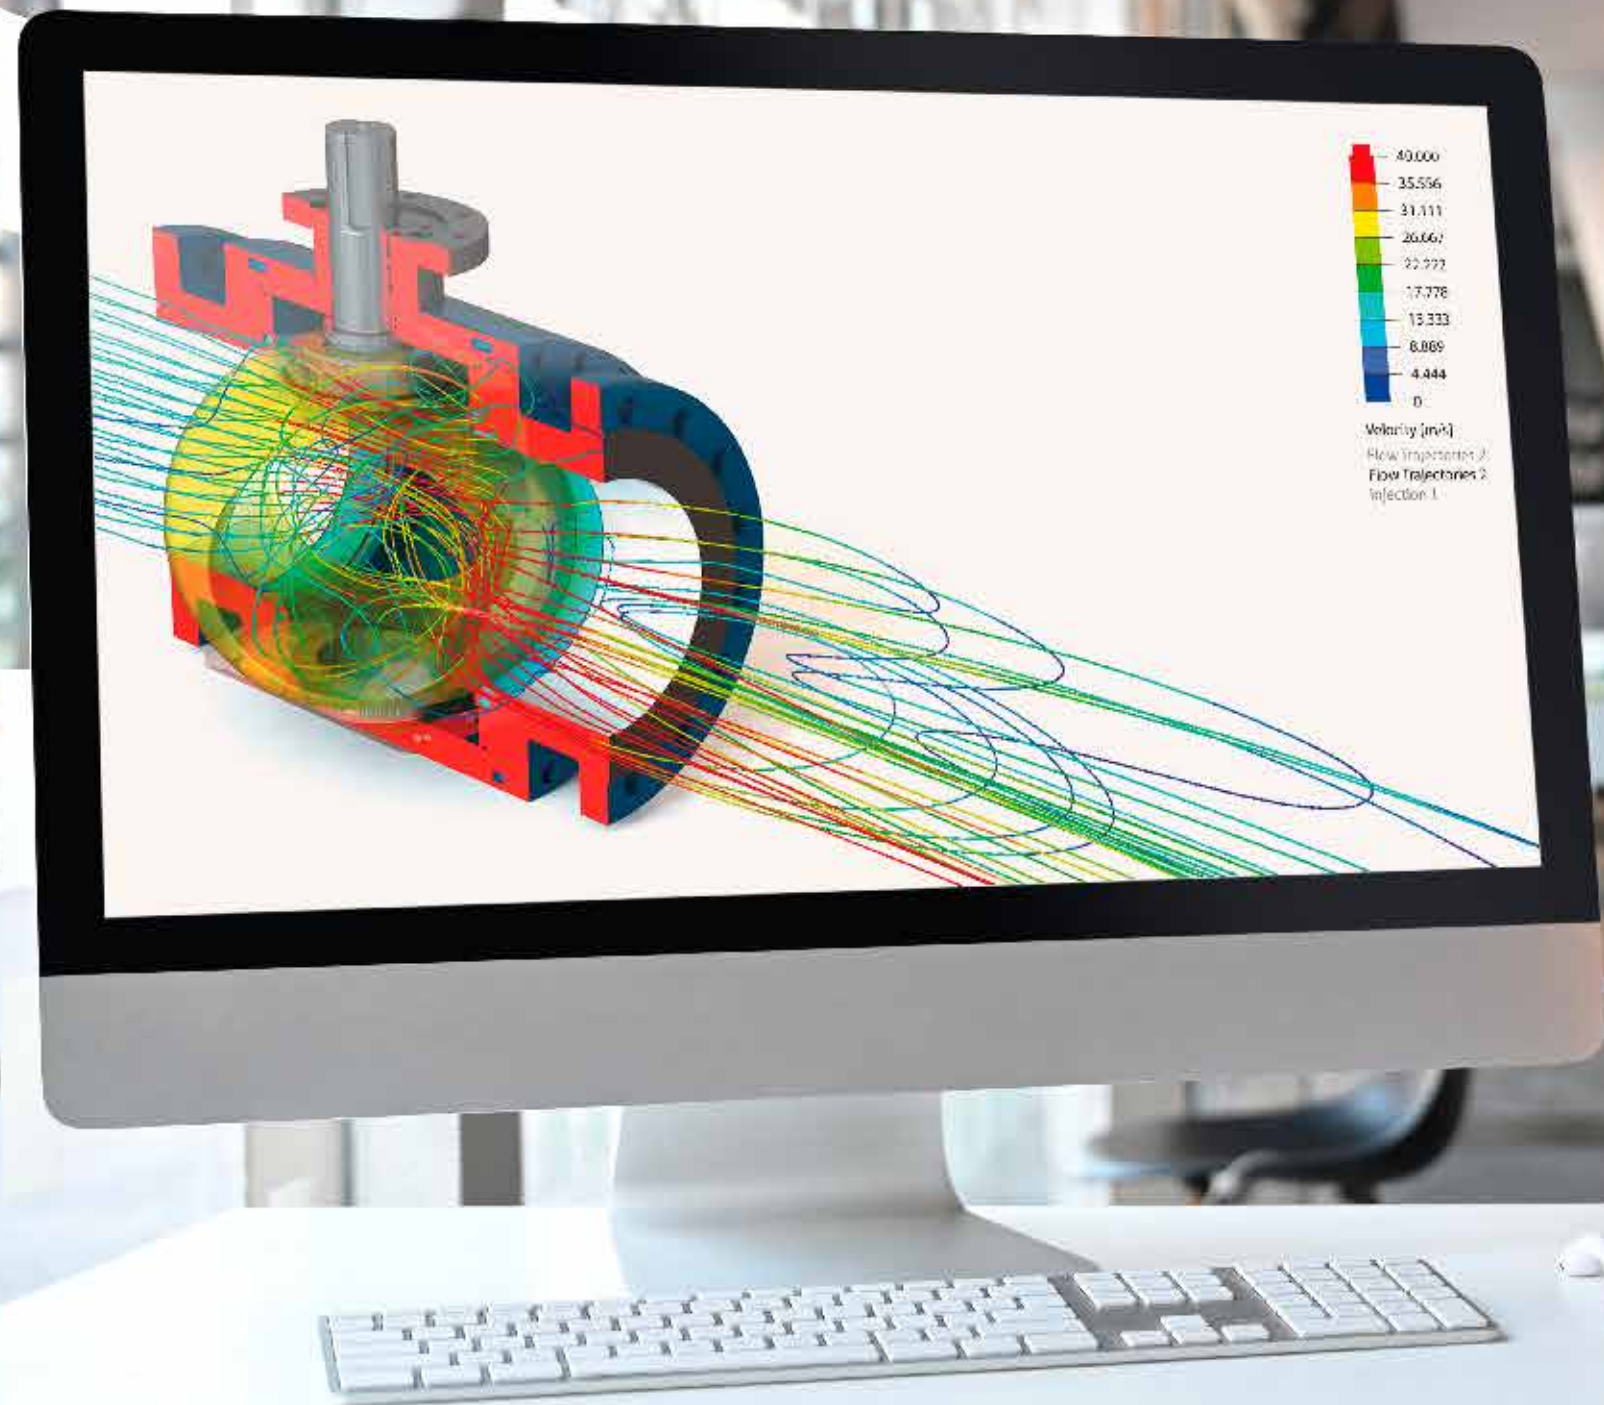

ARMATURY Group provides guarantee and after-guarantee servicing for the entire range of industrial valves to its customers.

Availability of fully equipped service vehicles makes it possible to dispatch them immediately. The strong point of the company is a NON-STOP emergency servicing which is available 24 hours a day.

Servicing includes:

- Standard and complete overhauls and repairs of valves and actuators
- Installations
- Modernization of actuators
- Adjustments of valves and actuators at users' plants or in the workshops of the company
- Measurement, regulation and automation

Development and Design

The company employs a team of 40 designers, technologists, research and development engineers who constantly occupy themselves with various development tasks focused on sales effectiveness.

They are engaged in designing constructions of industrial valves that will increase service reliability, safety and service life of products.

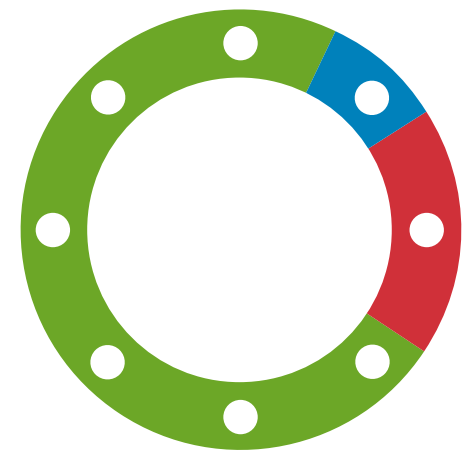

They use the latest software and hardware to accomplish it, some of which are:

- 3D CAD system Solid Works
- Calculation system SOLIDWORKS SIMULATION
- SOLIDWORKS FLOW-SIMULATION
- Electronic archive EPDM Works

Production

ARMATURY Group has an extensive manufacturing area.
The company constantly invests in new machinery and technological equipment,
robotic welding, test shops, storage facilities, new technologies of coating,
and optimizes logistics processes.

- Production area
- Storage
- Offices

The company possesses
the following machinery:

- Numerically controlled CNC machines
- Horizontal CNC machining centres
- Multifunctional machine centrum
- Automatic and robotic welding and surfacing machines
- Annealing furnaces
- Blasting box
- Paint shop
- Electronically controlled storage system
- Test equipment

Production on the new multifunctional machine centrum

We can make super-large valves sizes on our own FRUF 500/8 multifunctional machine, which is designed for full-scale 5D machining. The machine is equipped with a rotary table with carousel function, automatic replacement of milling heads and carousel holders and enables high precision machining of the part in one clamping.

What can this machine do?

- it can turn up to 8 meters in diameter
- thanks to the fixed carousel table, it can mill workpieces up to 7 meters long
- machine sealing rails and triple eccentricity
- can machine more complex and large valves
- and much more...

„We realize
perfectly
that quality
is indispensable
today...”

Quality

ARMATURY Group endeavours to develop and apply a quality management system and to improve its effectiveness continually. The company holds a variety of certificates needed for production, export and operation of valves under demanding conditions of the Czech market as well as foreign markets.

- Quality management system certificate according to EN ISO 9001:2008
- Environmental management system certificate according to EN ISO 14001:2004
- Occupational health and safety management system certificate according to BS OHSAS 18001:2007
- Quality management system certificate for welding according to EN ISO 3834-2
- Product certificates according to PED 97/23/EC
- API SPEC 6D certificate for petroleum industry for ball valves
- TA-Luft certificate - assessment of emission limits for valves
- Certificate according to Technical Reglement TP TC 032/2013 for devices operating with overpressure and according to TP TC 010/2011 on the safety of machinery and equipment for the market in the Eurasian Union
- SIL certificate - Safety Integrity Level
- OIT certificates for delivery of high-pressure valves to nuclear power plants in Russia
- FIRE SAFE certificate for fire tests

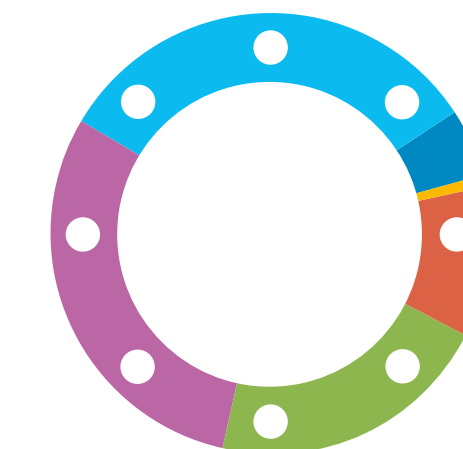

People

ARMATURY Group ranks among the important and stable employers in the Opava Region. The company sees its biggest capital in its employees.

The present number of employees of the company is 480 persons, of whom 42,4 % are white-collar employees and 55,5 % are blue-collar employees. Although the number of employees continues to rise, the fluctuation has remained at a low level.

The company is interested in systematic education of its employees. Emphasis is laid on training programmes – courses focused on strengthening of communication and other interpersonal skills and on improvement of knowledge of foreign languages and technological skills.
